

Connecting renewable energy to homes and businesses

Statutory consultation 19 February to 16 April 2025

FEEDBACK FORM

Green GEN Cymru is consulting on updated proposals for a new 132 kV electricity connection to transport energy to the national electricity network. This is part of our mission to help deliver renewable energy to homes, businesses, and communities.

Following careful consideration of feedback to our first consultation, and further technical and environmental assessments, we have developed a draft route alignment, showing proposed locations of the infrastructure we need. For this consultation, we are asking for your feedback on:

- A new 132 kV collector substation near Cefn Coch, Powys, known as the Grug y Mynydd substation
- Approximately 4.8km of underground cable from Grug y Mynydd substation through the proposed Llyn Lort Energy Park to a cable sealing end compound at Cors y Carreg
- The Cors y Carreg cable sealing end compound would enable the transition between underground cables and overhead conductors
- Approximately 45km of new overhead line supported on L7(c) steel lattice pylons (average height of 28.5m) from Cors y Carreg sealing end compound to a new switching station
- A switching station near Lower Frankton, Shropshire which allows the power to be isolated from a new proposed substation being developed by National Grid to connect to the existing 400kV national electricity transmission system
- Land which will be required for environmental mitigation, compensation, and enhancement measures

As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and construction access.

Third party utilities diversions and/or modifications would also be required as part of the construction of the Project.

We have published a range of information for you to find out more about our proposals, and to support you in providing feedback. Please see the back page for details. We encourage you to read these materials before completing this form. These documents are available, along with further information and an interactive map on our website www.greengenvyrnwyfrankton.com

We are committed to delivering the Project that seeks to balance the effects on those who live and work close to our proposals, with the policy and technical requirements we must also meet.

We know that people have different views on new infrastructure, and we recognise people have concerns about pylons featuring in the landscape. Delivering the infrastructure we need to add grid capacity, address climate change and help the country transition to electric vehicles and heating requires a careful balance.

Your knowledge is very valuable to us and we welcome any feedback you have on our proposals. It will help develop our understanding of potential impacts and opportunities arising from the Project, and inform the continued development of our proposals before we make an application for development consent. Please provide as much detail as you can when providing feedback including, if possible, specific pylon numbers. These can be found on the interactive map on our website.

Please contact our team on **0800 915 3590** or info@greengenvyrnwyfrankton.com if you need support in providing feedback.

**Please provide your feedback by
23:59 on 16 April 2025.**

About you

Title:

Name:

Age group:

Under 18

18 – 34

35 – 50

51 – 65

Over 65

Address:

Postcode:

Email address:

Would you like to receive email updates about the Project?

Yes

No

Are you responding on behalf of an organisation?

Yes

No

If yes, which organisation:

Do you own or occupy land within the Project boundary?

Yes

No

If yes, have you been contacted by our lands team?

Yes

No

If you have not been contacted by us, please provide the details of this land, including the address, if different to the above, so we can contact you.

Providing feedback

Feedback we've received to date from local people, landowners and specialist organisations has been important in developing our proposals, alongside our own assessments.

Our proposals are still open to influence and we'd like your feedback so we can continue to look at ways to keep effects as low as we can. We are keen to understand if people have comments on the potential environmental effects of the proposals or ideas for mitigating these effects, and if you have comments on the potential benefits of the Project. Please tell us if there are changes you think we can make to improve the proposals or reduce impacts and, importantly, why.

We're asking for comments on all of our proposals, including:

- A new 132 kV collector substation near Cefn Coch, Powys, known as the Grug y Mynydd substation
- Approximately 4.8km of underground cable from Grug y Mynydd substation through the proposed Llyn Lort Energy Park to a cable sealing end compound at Cors y Carreg
- The Cors y Carreg cable sealing end compound would enable the transition between underground cables and overhead conductors
- Approximately 45km of new overhead line supported on L7(c) steel lattice pylons (average height of 28.5m) from Cors y Carreg sealing end compound to a new switching station
- A switching station near Lower Frankton, Shropshire which allows the power to be isolated from a proposed new substation being developed by National Grid to connect to the existing 400kV national electricity transmission system
- Land which will be required for environmental mitigation, compensation, and enhancement measures

As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and construction access.

Third party utilities diversions and/or modifications would also be required as part of the construction of the Project.

We can only consider feedback about proposals, not wider themes such as energy generation or government policy.

Please provide feedback about our proposals only. The more detail you can provide, the better we can understand the potential impacts of our work.

We have organised the draft route alignment into five sections. If your feedback is about one of these sections or a particular location, please let us know.

There are several ways to provide Project feedback.

Online feedback form on our website:
www.greengenvyrnwyfrankton.com

Sending an email to
info@greengenvyrnwyfrankton.com

Hard copy feedback form, available
at consultation events or on request

Sending written feedback to
FREEPOST GREEN GEN CYMRU V2F

We'll look carefully at all of the feedback we receive and use it to review our work to date, and to inform how we develop the Project going forward.

ROUTE SECTIONS

We have organised our draft detailed route alignment into five sections to provide the opportunity for more detailed feedback.

For further information on each route section, please refer to our statutory consultation brochure.

1	2	3	4	5
Cefn Coch to Llangyniew	Llangyniew to Meifod	Meifod to Llansantffraid-ym-Mechian	Llansantffraid-ym-Mechian to Llanymynech	Llanymynech to Lower Frankton

Q1

Section 1: Cefn Coch to Llangyniew. Are there any specific factors we should consider when reviewing and developing our proposals for this section of the route?

If your feedback concerns the proposed locations of pylons in this area, then please provide the pylon number (as outlined on our interactive detailed draft route alignment map) where possible.

Q2

Section 2 : Llangyniew to Meifod. Are there any specific factors we should consider when reviewing and developing our proposals for this section of the route?

If your feedback concerns the proposed locations of pylons in this area, then please provide the pylon number (as outlined on our interactive detailed draft route alignment map) where possible.

Q3**Section 3 : Meifod to Llansantffraid-ym-Mechan. Are there any specific factors we should consider when reviewing and developing our proposals for this section of the route?**

If your feedback concerns the proposed locations of pylons in this area, then please provide the pylon number (as outlined on our interactive detailed draft route alignment map) where possible.

Q4**Section 4 : Llansantffraid-ym-Mechan to Llanymynech. Are there any specific factors we should consider when reviewing and developing our proposals for this section of the route?**

If your feedback concerns the proposed locations of pylons in this area, then please provide the pylon number (as outlined on our interactive detailed draft route alignment map) where possible.

Q5**Section 5 : Llanymynech to Lower Frankton. Are there any specific factors we should consider when reviewing and developing our proposals for this section of the route?**

If your feedback concerns the proposed locations of pylons in this area, then please provide the pylon number (as outlined on our interactive detailed draft route alignment map) where possible.

Privacy notice

Green Generation Networks Cymru Limited (a company within the Windward Energy Group) is committed to protecting your personal information. Whenever you provide such information, we are legally obliged to use it in line with all applicable laws concerning the protection of personal data, including the UK General Data Protection Regulation (GDPR).

How will Green GEN Cymru use information we collect about you?

We will use your personal data collected via this consultation for our legitimate business purposes, including:

- To analyse your feedback to the consultation
- To produce a Consultation Report, based on our analysis of responses (individuals will not be identified in the Report)
- To write to you with updates about the results of the consultation and other developments if you have opted in to receive these updates
- To keep up to date records of our communications with individuals and organisations

Any personal information you include in this form will be handled and used by (or made available to) the following recipients to record, analyse and report on the feedback we receive:

- Green GEN Cymru (which may include any subsidiary and parent companies).
- The Planning Inspectorate (which will consider our application for consent to build the Green GEN Vyrnwy Frankton Project).
- Legal authorities including law enforcement agencies or regulatory bodies as required by law to allow us to comply with our legal and regulatory obligations.
- The relevant secretary of state.
- Professional advisers, including our legal advisers and third-party companies and consultants that provide services on our behalf in connection with the Green GEN Vyrnwy Frankton Project.

What rights do I have over my personal data?

Under the terms of the UK GDPR, you have certain rights over how your personal data is retained and used by Green GEN Cymru. For more information, see our full data privacy statement at www.greengencymru.com/privacy-policy
