

GREEN GEN CYMRU LIST OF SUPPLIERS/SUBCONSULTANTS VYRNWY FRANKTON

The following is a list of suppliers that are currently engaged in the supply chain for the Vyrnwy Frankton project to carry out surveys on behalf of Green Generation Energy Networks Cymru Limited.

We are publishing this list so that people affected by our surveys have a simple means of independently verifying whether personnel carrying out surveys are associated with us but it is published without prejudice to our discretion to instruct and authorise appropriate personnel to enter land to conduct surveys pursuant to our powers under the Housing and Planning Act 2016. The list is accurate at the time of writing and we may update the list from time to time at our discretion. On occasion we may instruct surveys to be carried out by different suppliers who are not yet on this list. In any event any person entering land pursuant to our powers under the Housing and Planning Act 2016 is required to be able to produce evidence of that authorisation.

Please contact WSP on the contact details provided in their correspondence with you if you have any further queries.

Suppliers / Subconsultants GGC Vyrnwy Frankton

- a) WSP UK Ltd.
- b) Arcadis and their sub-contractors LUC, Just Mammals, Headland, David Hawkings, Harry Elliot, Intelligent Data Collection, Alan Stratford Associates and SLR.

- e) Stantec and their sub-contractors LSTC Group
- f) StirlingX

All Authorised Contractors will undertake ongoing risk assessments when entering and surveying land in accordance with best practice having regard to the type of survey being carried out. If there are any known risks or hazards which an owner wishes to bring to the attention of the Authorized Contractors, these can be identified by marking up the plan attached to the notice issued and returned to the Land Agent in the pre-paid envelope provided. Alternatively, Owners and Occupiers can contact the Land Agents using the contact details provided to discuss further.
